

## MiniPatch compact patching system

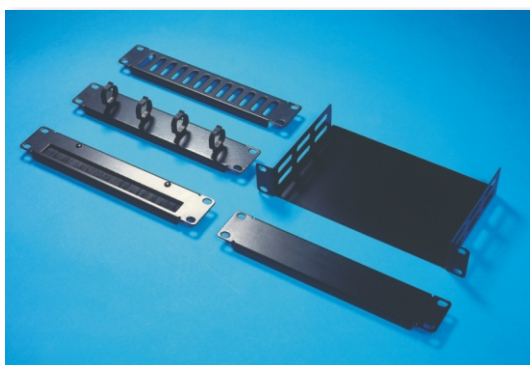

The Austin Taylor MiniPatch system is designed for use in small office / home office (SoHo) installations or any location where a 19" rack mount box is inappropriate.

The 8U capacity provides ample capacity for most small to medium installations and the semi-gloss black finish fits unobtrusively into the office environment.

A wide range of accessories is available for the MiniPatch allowing it to be used for many applications including PBX, Ethernet, Token Ring and ISDN. (See below for details)

MiniPatch V2, plain door style

**Accessories (clockwise from top)**  
Vent panel, Hub/modem shelf, blank panel, letterbox panel, cable management panel
